

Jaymak™ Infection Control Service

Does your organisation have a viral outbreak maintenance or decontamination plan?

The Jaymak specialist infection control service utilises Hygiene Shield Coviclean for microbial disinfection.

Testing confirms that Hygiene Shield Coviclean is **99.99% effective against germs & viruses and 99.999% effective against gram positive and gram negative bacteria.**

The process is carried out as outlined in the SWMS in accordance with the requirements of our ISO 9001, ISO 22000, HACCP and Food Safety Guidelines.

All cleaning and disinfection is verified by a qualified hygiene technician through the use of an ATP monitoring system.

Photos of all completed works and test results are provided in an accompanying post service report.

Coviclean Surface Disinfectant combats viruses such as:

- Bovine Coronavirus
- SARS virus
- HIV (Human Immunodeficiency Virus)
- Rota-virus strain WA
- Vaccinia virus
- Bovine viral diarrhea virus
- Hepatitis C virus
- Herpes simplex virus
- Bird flu virus
- Influenza A virus

About Hygiene Shield Coviclean

Coviclean Surface Disinfectant is a pH neutral surface active disinfectant. It contains no aldehydes, active chlorine or alkalis.

It is biodegradable and Australian- Made.

Suitable for use in food areas, no rinsing required.

Hygiene Shield Coviclean is suitable for fogging for effective disinfection.

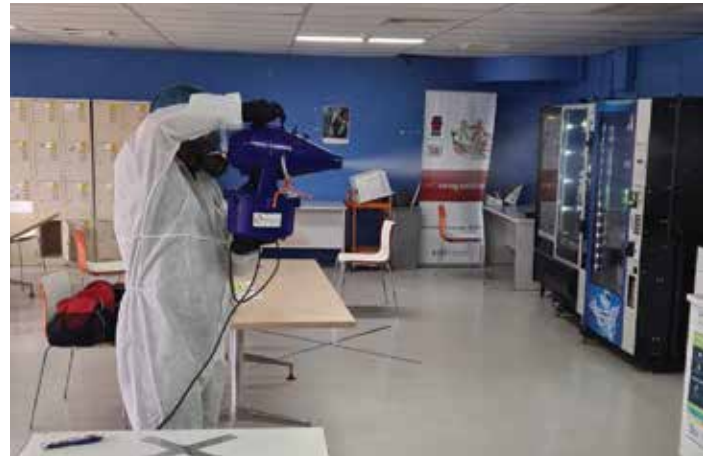

Hygiene Shield Coviclean is tested and confirmed as an effective cleaner for SARS-CoV-2 (COVID-19).

The microbiocidal spectrum of Coviclean Surface Disinfectant covers gram-positive and gram-negative bacteria, yeast and fungi.

Coviclean conforms to Boeing Specification Support Standard (BSS7434) for Chemical Compatibility of Cleaning Products and

Interior Parts/Materials of Commercial Transport Aircraft.

This means that Coviclean has passed various corrosiveness tests that indicate that it does not corrode surfaces including vinyl surfaces, painted surfaces, fabric, leather, sealants and rubber.
